What is AutoCam?

DeryTech's Auto-Cam In-Car Surveillance System is designed to provide security for all vehicles, The patent-applying video security system is a one-of-a-kind surveillance device that integrates cameras into a rear-view mirror, which acts as a recorder. The additional cameras can be wired to the rear-view mirror recorder. The system is designed to capture the license plates of the vehicle in front or behind the user's vehicle and is great for day/night video surveillance.
